

Testimonials from Alumni

Samer Talat – Jordan

NCTU provides generous fellowships for qualified international students, free Chinese class to help me adapt myself to local environment, and the increasing international enrollment has created a more diversified campus for me to meet people from around the world. NCTU has everything I need for a higher education. Join us, come to NCTU!

Nga Thi Nguyen – Vietnam

Having been living and studying in NCTU for one year, I am happy to say that joining the NCTU community has been a great experience for me. NCTU offers an excellent education with a wide variety of disciplines. I have been engaged in multidisciplinary studies and international collaboration. Moreover, NCTU provides not only a thriving academic environment but also a variety of activities, conferences, exhibits, memorials, art and other cultural activities. NCTU is adjacent to the famous Hsinchu Science Park and has a close ties with many industrial companies. Studying here you will have opportunities of work-study and internships programs in famous enterprises.

Dynamic Education Environment for International Students

I am pursuing a Ph.D. degree in the Institute of Nanotechnology, specializing in flexible semiconductor devices. In my two years here, I have witnessed a very great dynamism in the education environment for international students; think the relationship between the international students and the Taiwanese students is very friendly; we also receive a lot of support from the

International Service Centre (ISC). In the beginning, I felt a little frustrated about the communication barrier... But many activities were organized by the ISC to help us foreign students understand Taiwan's culture and history. Currently, I am learning a lot in my semiconductor processes research as related facilities are provided in standard clean rooms demonstrating the device. NCTU ranks No. 1 in engineering in Taiwan, with a strong focus on applied science. I love the environment in this university with its new buildings and the nearness of the sea.

In other aspects, a very high quality health care is provided with compulsory national health insurance to all international students. Taiwan is a paradise for shopaholics. You can try the latest, fanciest items in malls, department stores, or from street vendors. Vendors at local night markets also carry a wide array of curios. Chinese cuisines are very famous everywhere in the world and I like many delicious Taiwanese foods, like pearl milk-tea and meatballs. Taiwan government's scholarship program for foreign students is also very attractive. I decided to pursue a Ph.D. degree here because Taiwan is a springboard to the Southeast Asian market. In these two years, I have witnessed the progress of a very strong economy and society in Taiwan. These factors all reinforce my opinion that Taiwan offers the best education environment for foreign students.

Koritala Shailaja - India

NCTU is a nice place for learning. I am proud to be a member of EECS Colleges at NCTU, where engineering and computer science field is the largest and notable in Taiwan. Studying abroad is really making a change in my life, and selecting NCTU as my international education is definitely an excellent choice toward my future goal.

Bustami Y. - Indonesia

I decided to pursue my degree in NCTU due to NCTU's prestigious reputation as a top leading university in Taiwan. Study at NCTU provides an excellent opportunity to enhance my knowledge and ability, and to gain a bright career in the future. The part of what I love to study here is the privilege of using all kinds of facilities and resources available in all what I needed.

Martin Hornansky - Slovakia

I chose NCTU for the excellent reputation of their EECS faculty. Students are always welcome to the professor's offices to discuss academic ideas and issues. The good facility and equipment at the campus provides a supportive learning environment for students to enhance their critical thinking. It is really an enjoyable high learning experience at NCTU.
